Not a Public Record-For Inter/Intra-Agency Policy Deliberations-

Hi Ed,

I'm not familiar with this site. Do you have the correct location in the photo you sent? The reason I ask is that when I checked our Wetland Change data base I did not see any wet changes in the immediate area. Is this a Corp. enforcement action that Crystal mentioned, Town, State?

The Town issued the local Order of Conditions for the SE File No.243-0722 on May 7, 2009.

Let me know ,

Liz

Liz,

Crystal Gardner at the Corps informed me that there is an outstanding wetland violation on this site. Some 23,511 s.f. of wetlands were filled without a permit during the clearing and grading activities that Me. Canada performed back in 2008 or so. At a minimum, I will reply to ARMY with this and state that this matter will need to be resolved by wetland restoration or after the fact permitting with mitigation.

What do you think?

Subject: Proposed US Army Reserve Military Construction Project, 103 and 135 East Washington St, North
Attleborough, MA wetland inquiry

EPA received a letter from the Department of the Army, Headquarters, 99th Regional Support Command in Fort Dix, NJ, informing us of the preparation of an Environmental Assessment for the proposed construction and operation of an Army Reserve Center to be located in North Attleborough, MA. The letter is attached. The address of the parcel is listed as 103 and 135 East Washington Street in North Attleborough which had a file number MA DEP 243-0722 dated 8/8/2008 by David Canata of North One Development Corp.

It appears from current birds eye photos of the site on Google Maps or Bing that soils have been imported to the site disturbing vegetation on the site.

Can you please inform me what you know of the activity on this site to date and if the soil importing activity is legal or not,

Was a SWPPC permit applied for at this location sometime around 8/8/2008.

(See attached file: US Army Reserve North Attleborough_5-13-11.pdf)
